## Professional Experience

**GENIES | Full Stack Developer** **Los Angeles CA, In Office**

7 months | AI avatar startup partnered with Unity, NBPA, UMG Jun 2025 - Present 2025

- Led development of a full stack real-time job monitoring dashboard that reduced debugging time by ~75% for 200+ concurrent AI generation jobs, providing live progress tracking and instant slack failure notifications
- Cut asset generation time by 40% through multi-stage pipeline with Google AI Gemini integration, action caching, and parallel processing workpools
- Created KPI dashboard elevating feature progress to executives and board for strategic decisions
- Engineered multi-tier authorization system across Convex backend, admin dashboard, and consumer app enabling role-specific data access and operations

**IBM | Full Stack Developer Intern** **Austin TX, Remote**

12 months | AI and Data Jul 2023 - Aug 2024

- Built 40+ AI-powered features for Cloudpak4aiops incident management, reducing manual alert triage for Fortune 500 clients
- Championed an internal product that slashed bug reproduction time by **85%** to read, store and replay client state and data when reporting a bug
- Owned end-to-end delivery of a critical feature supporting 600k active incidents simultaneously with granular role-based access control
- Reduced backlog of bugs by **40%,** over 130 over the course of **16 months**
- Created decks and performed client presentations and training for 100s of attendees

**IBM | Quality Assurance Intern** **Austin TX, Remote**

4 months | AI and Data May 2023 - Jul 2023

- Delivered a testing system **twice as reliable** by rebuilding the 2-year-old end-to-end testing pipeline using Nightwatch on Selenium to automate testing across different browsers
- Developed internal tooling to automate the creation of new end-to-end tests by recording the actions of users on multiple different devices and browsers reducing developer frustration

## Projects

**INSIGHT** **React, Python/Flask, MongoDB, OpenAI/Claude API**

- Enabled **a local business** to reconnect with inactive customers through targeted pain point analysis, driving a 50% increase in 6-month dormant user re-engagement by addressing critical product gaps
- Scraped and analyzed 15,000+ Reddit posts across 50+ subreddits using automated NLP pipeline, processing 3.2M words of user feedback to generate actionable insights stored in MongoDB

## Technical Skills

**Languages:** Python, JavaScript (TypeScript), Java, HTML & CSS, SQL
**Frontend:** React, Redux, Next.js **| Backend:** Node.js, Express, FastAPI, MongoDB
**Cloud/Tools:** AWS (DynamoDB, Lambda, ECR, EKS), Datadog, Docker, Heroku, Git, Jira, Jest, Pytest
**Hobbies/Interests:** Gaming, Aquarium & Terrarium making, Skiing, Golfing

## Education

**Computer Engineering** at the **University of British Columbia** Anticipated 2026

Relevant Courses: Algorithms & Data Structures, Software Testing and Analysis, Database and Design
